

Evolve Shower bath - New

Feedback from the market indicates that P & L shaped shower baths remain strong selling baths. However, there is potential for an alternative rectangular design that affords a similar showering area but takes up less width in the bathroom compared to a traditional shaped shower bath.

Size : 1700x750mm

Advice:

Consider this as an alternative shower bath in 2020.

By bringing each side in by 40mm at the showering end the consumer gains 80mm of width on a 750mm wide bath

750mm wide baths are a real luxury for bathing

Proposed 1700x750mm Evolve shower bath. Will accept rectangular bath panels

The rectangular design of the bath means that the consumer does not have to buy a shaped glass screen
