

DECORATIVE HEATING

— PRODUCT GUIDE —

Inside this guide we have a wide range of radiators to help keep your home warm and welcoming. Our range of decorative heating has been selected to look good, and perform in any room.

We stock quality brands **Henrad & Pro**; all with great warranties and a range of styles, perfect for every budget and style.

All of our radiators have their heat output detailed so you can find the ideal option for each room as well as their overall dimensions.

We are sure you'll find the perfect choice to match your style.

Premium Panels: The peak of style and elegance, these sleek, radiator models adds style to your modern home, with superb heating capabilities.

Column: Column radiators are exceptionally attractive heating appliances, that are an energy efficient way of heating your home due to the larger surface areas within the columns, which emit significantly larger levels of heat.

Tubed: Tubular radiators, as the name indicates, are tube shaped radiators. One of the greatest benefits of a tube radiator is that as well as providing heat, the tube design allows you to hang items out to dry from your radiator.

Compact: Timeless radiators with superb capabilities.

LST: Safety radiators reach a maximum surface temperature of 43°C, a relatively low comparative surface temperature compared to most models of radiator available.

COLUMN

The most modern execution of a traditional concept, this classic style brings innovation and reliability to a high performance design. Vertical and horizontal options offer a modern alternative to a traditional panel radiator, and will enhance both contemporary and traditional settings.
